## CONTENTS

*Preface* vii

*List of Committees* viii

*REVIEW TALKS*

*Introductory remarks*
T.E.O. Ericson 3c

*Chiral symmetry and nucleon structure: Low energy aspects*
W. Weise 7c

*Algebraic models of hadronic structure*
F. Iachello 23c

*Electron scattering and nuclear structure*
V.R. Pandharipande 43c

*Electron scattering and weak interactions*
E.M. Henley 61c

*Experiments with internal targets in electron storage rings*
J. Duclos 77c

*Quark exchange forces*
N. Isgur 91c

*Testing QCD with milli-TeV electrons*
F.E. Close 109c

*Quark models and QCD – towards a consistent connection*
A.W. Thomas 123c

*Measurement of the spin dependent structure functions of proton and neutron*
K. Rith 139c

*Probing nuclear structure with multi-GeV electrons*
L. Frankfurt and M. Strikman 155c

*Hadronic physics with multi-GeV electrons*
E.J. Moniz 169c

*WORKING SESSIONS*

**FROM QCD TO HADRON AND NUCLEAR PHYSICS**
(Convener: M. Chemtob)

*From QCD to hadron and nuclear physics*
M. Chemtob 185c

*From QCD asymptotic predictions to few GeV experiments: The example of exclusive hard processes*
B. Pire 223c

*Perturbative QCD in exclusive processes*
N. Isgur 229c

**QUARKS IN NUCLEI**
(Convener: P.J. Mulders)

*Quarks in nuclei*
P.J. Mulders 237c

*Color dielectric approach to the nucleon and nuclear matter*
G. Chanfray, J.F. Mathiot and H.J. Pirner 247c

*Quark exchange effects in electron–nucleus scattering*
A.E.L. Dieperink and P.J. Mulders 253c

*Quarks in light nuclei*
P. Gonzalez and V. Vento 259c

*Quarks and the saturation of nuclear matter*
P.A.M. Guichon 265c

*Few-body form factors: Mesonic or quark degrees of freedom?*
J.-F. Mathiot 271c

*Strong coupling QCD and the nucleus*
G.A. Miller 277c

*Corrections to the Ellis–Jaffe sum rule*
A.W. Schreiber and A.W. Thomas 287c

*Chiral and relativistic effects in backward deuteron disintegration*
E. Truhlik and J. Adam 289c

*Quark exchange currents within the quark cluster model*
K. Yazaki 295c

**ELECTRO- AND PHOTO-PRODUCTION OF STRANGENESS**
(Convener: R. Bertini)

*Electro- and photo-production of strangeness*
R. Bertini 307c

*Strange dibaryons in the Skyrme model*
P.J. Mulders and J. Kunz 339c

**NUCLEONS IN NUCLEI**
(Conveners: C. Ciofi degli Atti and J.-M. Laget)

*Nucleons in nuclei (I)*
C. Ciofi degli Atti 349c

*Y-scaling analysis of inclusive electron scattering and the nucleon momentum distribution in few-body systems and complex nuclei*
C. Ciofi degli Atti, E. Pace and G. Salme 361c

*Role of the Δ isobar in the longitudinal response*
M. Ericson 371c

*Nucleon form factors*
I. Sick 379c

*Nucleons in nuclei (II)*
J.-M. Laget 391c

*Few-body nuclear physics in future $(e, e'p)$ experiments*
D. Beck 413c

*The nucleon spectral function in infinite nuclear matter*
O. Benhar, A. Fabrocini and S. Fantoni 423c

*Three-body mechanisms in hadron collisions: The A=3 system*
R. Frascaria 431c

*Electromagnetic study of the Δ-resonance*
P.U. Sauer 441c

*Evidence for charge exchange in the $^4He(e, e'p)^3H$ proton knockout reaction*
P.K.A. de Witt Huberts 449c

**EXPERIMENTAL TECHNIQUES**
(Conveners: B.H. Schoch and H.K. Walter)

*Experimental techniques (I)*
B.H. Schoch 455c

*High resolution magnetic spectrometers*
K.I. Blomqvist 457c

*Present status of polarized solid-state targets for experiments with real and virtual photons*
W. Meyer 465c

*Tagged photon beam from a jet radiator*
G. Ricco, M. Anghinolfi, P. Corvisiero, C. Costa, M. Sanzone, M. Taiuti, A. Zucchiatti, E. de Sanctis, N. Bianchi, P. Levi Sandri, V. Luccherini, V. Muccifora, E. Polli, A. Reolon, F. Garibaldi, A. Bertocchi, S. Frullani and G. Urcioli 477c

*Study of multi-hadron reactions with multi GeV electron accelerator*
G. Tamas 483c

*Experimental techniques (II)*
H.K. Walter 493c

*A polarized $^3$He target for nuclear physics*
R.G. Milner, R.D. McKeown and C.E. Woodward 495c

*Out-of-plane spectrometry: Why and how*
C.N. Papanicolas, R. Alarcon, L.S. Cardman, S. Dolfini, R.M. Laszewski, J. Mandeville, S.E. Williamson, S.A. Wood and A.M. Bernstein 509c

*Polarized internal target for HERA*
E. Steffens 519c

*Laser-driven polarized sources of hydrogen and deuterium*
L. Young, R.J. Holt, M.C. Green and R.S. Kowalczyk 529c

**THE NUCLEON AND ITS RESONANCES**
(Convener: M.M. Giannini)

*The nucleon and its resonances*
M.M. Giannini 537c

*Virtual and real rhos*
P. Christillin 567c

*On the $\gamma N\Delta$ (1241) coupling constants*
P. Christillin and G. Dillon 577c

*The role of the Roper resonance in nuclei*
B. Desplanques 587c

*A confining potential for quarks*
M. Fabre de la Ripelle 595c

*List of participants* 603c

*Author index* 607c
